

Repeat Course/ Grade Replacement applies only to classes taken through CECFC. Grade replacement allows a student to repeat a course and remove the weight of the earlier grade from their cumulative grade point average (GPA). Please review the following grade replacement information for details:

- A course may be repeated for grade replacement ONLY ONCE. Additional attempts will NOT be considered for grade replacement.
- Course credits are counted only one time towards graduation requirements.
- The repeated course must be the exact course name, prefix, and number of the original course and with the same institution.
- Pass/Fail grades are excluded from grade replacement.
- A course in which an academic integrity violation has been officially reported may not be repeated for grade replacement.
- Courses may be repeated for grade replacement only in those cases in which a student received a grade of B-F on the first attempt. Any withdrawals (W) made prior to the grade of B-F will not count as an attempt.
- If the second grade earned is a W, the W will count as the second attempt and, because it has no grade value, the previous grade (B-F) will continue to factor into the calculation of the GPA.
- All grades received will be shown on the student's transcript; however, the GPA will be re-calculated after the repeat grade is posted, based off of the highest grade received.
- The grade of the original course will not be removed from the GPA calculation until after the new grade has been posted at the end of the semester.
