

# Adobe Download Guide for Chromebook Users

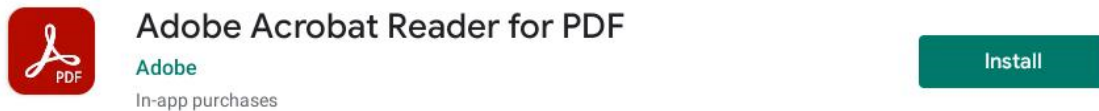

(1) Open the Google Play Store

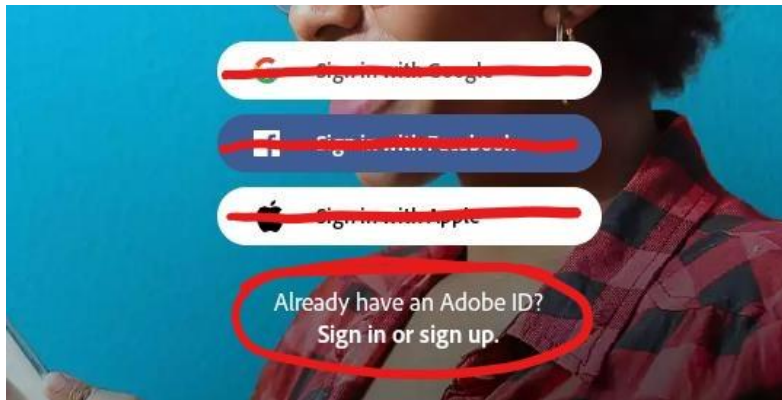

(2) You should see **Adobe Acrobat Reader for PDF** as an available download. Click on the icon to install.

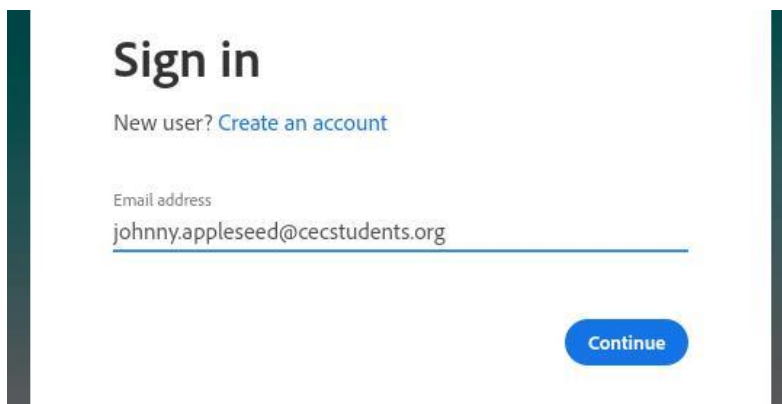

[If you do not see it, type 'Adobe Acrobat Reader for PDF' in the search bar at the top *exactly and entirely*. The search results will not show you the app if you simply type in 'Adobe'.]

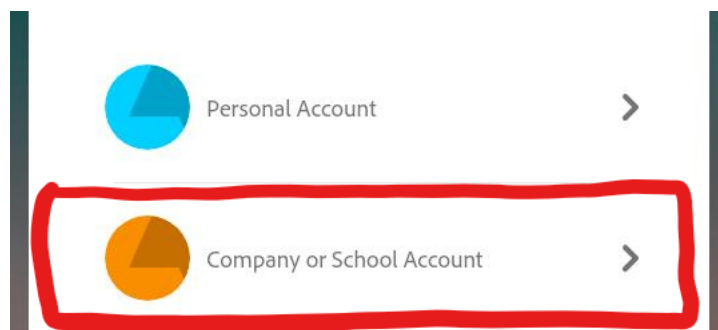

(3) On the app description page, click on the 'Install' button in the upper-right corner. Once installed, click on 'Open'.

(4) Click on 'Sign in or sign up.' at the bottom of the screen.

(5) Sign into your Adobe account using your CEC student email account.

(6) Choose 'Company or School Account'

(7) You will be prompted to type in your CEC student email account *again*, this time through Microsoft for authentication. Sign in with your CEC student account and password.

(8) From there you should be all signed in! Work through the short tutorial that Adobe provides to familiarize yourself with where to find files and features.
